

Test case ingestion in MongoDB

Creating Vector Index

The screenshot shows the MongoDB Atlas Data Explorer interface. The left sidebar displays the 'Data Explorer' section with a tree view of clusters and collections. The main panel shows the 'Indexes' tab for the 'testcases' collection. A table lists the existing index: a regular index on the '_id' field. A 'Create Index' button is visible. A blue informational banner states: 'Looking for search indexes? These indexes can be created and viewed under Search and Vector Search.'

Name & Definition	Type	Size	Usage	Properties	Status
_id	REGULAR	4.1 KB	2 (since Sat Aug 15 2026)	UNIQUE	READY

The screenshot shows the MongoDB Atlas Search & Vector Search page. The left sidebar has a 'Search & Vector Search' section with options for 'AUTO EMBEDDING', 'NATIVE RERANKING', and 'SHORTCUTS'. The main panel displays a table of search indexes. A blue informational banner states: 'M0 free clusters have a limit of 3 search and vector indexes per cluster. Indexes Used: 1 of 3.'

Database	Collection	Index Name	Status	Queryable	Type	Index Fields	Documents (Estimated)	Size	Relevance
db_testcases	testcases	vector_index_to	READY	✓	vectorSearch	"embedding", "testCaseId", "module", "title", "description"	0 (0%) indexed of 0	0B	0E

Creating RAG-Ingestion-Mongo Vector DB

The Langflow interface displays a workflow for creating a RAG-Ingestion-Mongo Vector DB. The workflow consists of three main components: 'Read File', 'MistralAI Embeddings', and 'MongoDB Atlas'. The 'Read File' component is connected to the 'MistralAI Embeddings' component, which is then connected to the 'MongoDB Atlas' component. The 'MongoDB Atlas' component is configured with the following settings:

- Database Name: db_testcases
- Collection Name: testcases
- Index Name: vector_index_1c
- Index Type: vector_index_1c
- Search Query: Enter a query...

The 'MongoDB Atlas' component is also configured with the following settings:

- Enable mTLS: ☐
- Cache Vector Store: ☐
- Insert Mode: append
- Number of Results: 4
- Index Field: embedding
- Filter Field: Type something...
- Number of Dimensions: 1024
- Similarity: cosine
- Quantization: Select an option

The MongoDB Atlas interface shows the 'testcases' collection in the 'db_testcases' database. The collection contains 500 documents. The interface displays a list of documents, including the following details:

- id: ObjectId('6a8033b210e5ccd3f155f693')
- text: "Verify Normal registration"
- embedding: Array (1024)
- module: "Registration"
- testcaseId: "TC_001"
- prerequisites: "Counter shift should be started for User"
- title: "Normal Registration"
- steps: "1. Launch the application
2. Login to the application with valid credent..."
- expectedResults: "Valid UserID should get generate with details and should be able to take..."
- automationManual: "Automation"
- priority: "P2"
- createdBy: "Sumitha"
- risk: "High"
- version: "V7"
- type: "Function"
