

```
2 <html lang="en">
577 <body>
728 <script>
765 async function sendMessage() {
770
771 // Clear empty state if exists
772 const emptyState = chatMessagesDiv.querySelector('.empty-chat-state')
773 if (emptyState) {
774   emptyState.remove();
775 }
776
777 // Add user message to chat UI
778 addMessageToChat(message, 'user');
779 chatInput.value = '';
780 chatInput.style.height = 'auto';
781 sendBtn.disabled = true;
782
783 // Show loading indicator
784 showLoadingIndicator();
785 isLoading = true;
786
787 try {
788   console.log('Sending message to Langflow API:', message);
789
790 // Build proper request with CORS headers
791 const requestOptions = {
792   method: 'POST',
793   headers: {
794     'Content-Type': 'application/json',
795     'Accept': 'application/json',
796     'Origin': window.location.origin,
797     ...(LANGFLOW_API_KEY && { 'X-API-Key': LANGFLOW_API_KEY
798   },
799   body: JSON.stringify({
800     output_type: 'chat',
801     input_type: 'chat',
802     input_value: message
```

Implementation Complete!

All requirements have been successfully implemented:

- Custom HTML/CSS chat UI (NOT Langflow embed)
- Positioned top-right with toggle button
- Status indicator showing chat state
- Copy chat output functionality
- Clear messages feature
- Sample fund transfer user story with copy option
- Langflow API direct integration
- Comprehensive test case generation guidance
- Professional styling and animations
- Responsive design
- Keyboard shortcuts
- API connection testing
- Error handling and debugging features

The Test Case Generator is ready to use!

Would you like me to make any adjustments or create a quick reference guide document?

Test Case Generator

Generate comprehensive test cases with AI assistance using direct Langflow API integration

How to Use This Tool

- Read Instructions:** Understand how to effectively generate test cases
- Copy Sample Story:** Use the sample fund transfer user story below
- Open Chat:** Click the chat bubble button in the bottom-right corner
- Paste & Ask:** Paste the user story and ask for test cases
- Review Output:** Get AI-generated test cases in the chat
- Copy & Use:** Copy the results and use them in your test management tool

Sample User Story - Fund Transfer

This is a ready-to-use sample user story for a fund transfer feature. Click the button below to copy it, then paste it into the chat to generate comprehensive test cases.

🔥 Sample User Story - Fund Transfer

This is a ready-to-use sample user story for a fund transfer feature. Click the button below to copy it, then paste it into the chat to generate comprehensive test cases.

★ **Sample: Fund Transfer Feature**

account number 2. User can enter transfer amount with minimum of \$1 and maximum of \$10,000 3. System displays transfer summary (From, To, Amount, Date, Fee) 4. User can confirm or cancel the transfer 5. Transfer is processed immediately and confirmation is displayed 6. Confirmation email is sent to user and recipient 7. Transaction appears in account history with timestamp 8. User receives SMS notification on successful transfer Edge Cases to Test: - Transfer to own account - Transfer with insufficient balance - Transfer to invalid account - Transfer with special characters in amount - Concurrent transfers - Network failure during transfer - Duplicate submission prevention - Daily transfer limit enforcement - Peer-to-peer transfer security - Fraud detection scenarios Please generate comprehensive test cases covering all scenarios, including positive tests, negative tests, edge cases, and security tests. Include preconditions, steps, expected results, and acceptance criteria for each test case.

📄 Copy Sample Story

✅ **Best Practices for Test Case Generation**

What to include when asking for test cases:

Feature Description: Clear description of what you want to test

Acceptance Criteria: What should pass/fail

Ask Gemini

127.0.0.1:8000

Test Types: Functional, negative, performance, security, etc.

Priority Levels: Specify if needed (High, Medium, Low)

Expected Test Case Format:

Test Case ID: Unique identifier

Title: Clear, descriptive title

Priority: Critical, High, Medium, or Low

Preconditions: Setup requirements

Steps: Numbered test steps

Expected Results: What should happen

Test Data: Specific inputs needed

📡 **API Connection Status**

Endpoint: localhost:7860

Status: 🟢 Connected

Tip: Click the [🔗 Test API](#) button in the chat to verify connection

Test Case AI Assistant

Ask me anything about generating test cases.

Or paste the sample story above and ask for test cases

🔗 Testing API connection...

✅ **API Connection Successful!**

📄 **Response Details:**

- Status: 200 OK
- Endpoint: Connected
- Server: Responding
- Mode: CORS enabled

🔥 You can now use the chat to generate test cases.

👉 Next step: Paste the sample fund transfer story and ask for test cases!

Type your message or paste a user story...
